The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 21, 23-28, 30-32, 34, and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelley in view of Yiu '686 (Yiu). Kelley discloses the claimed target block with the exception of the use of posts around dart holes to guide dart tips into the holes. However, as disclosed by Yiu such a technique is known in the art. It would have been obvious to one of ordinary skill in the art to have employed such with Kelley's target block holes as well to better guide the darts into them. The ridge structure which separates the blocks can be as element 50 of Kelley.

Concerning the "grooves" limitations of claim 21, as can be seen in Fig. 2 a groove is formed on the outer periphery of the posts where "connection plates" 41 meets the post.

Regarding claims 28 and 30, the sidewalls of each receiving member of Kelley are considered the supporting members. Protrusion 134 is located between each target block and the switches.

Concerning claims 31 and 32, note Col. 2, lines 25-27 of Yiu which indicates the flexible nature of the posts.

Claims 22, 29, and 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3711

Applicant's arguments with respect to claims 21, 23-28, 30-32, 34, and 35 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication should be directed to Mark S. Graham at telephone number 571-272-4410.
